

Guangzhou Jieneng Textile Technology Co., Ltd.

Guangzhou Jennon Textile Technology Co., Ltd. is a textile chemical technology enterprise integrating in R&D, manufacturing, application of overall dyeing performance and sales. Furthermore, we are working closely with a few of local Textile professional institutions and foreign companies, in order to develop more solution items to support dyeing performance.

Its main business is textile chemicals, including acid dyes, dyeing pre-treatment auxiliaries, dyeing auxiliaries, post-finishing auxiliaries, special-style finishing agents, and functional finishing auxiliaries.

There are more than 300 products in the series, and the products are mainly sold to domestic and international regions such as Southeast Asia, the Pearl River Delta, and the Yangtze River Delta. With the tenet of "Professionalism, Innovation, Quality and Service ", the company takes the direction of doing fine work, and takes the technical innovation and excellent management as the engine to develop steadily in the field of textile chemicals.

With years of experience in the printing and dyeing and textile industries, Guangzhou Jennon Textile Technology Co., Ltd. has provided a complete set of solutions for multiple customers, providing free R & D proofing, free home inspection products. A company not only just selling products, but more on service.
